

CamControl MV Software History

CamControl MV V1.1.6

2011-09-29

- Operator Management added
 - Adding, changing and deleting operators
 - Flexible option of permission settings for different operators
- Extended PTZ control via mouse cursor and Joystick
 - PTZ with manual speed control for IP cameras from Sanyo, Sony, Messoa, Vista, Dynacolor and Grundig
- Monitor context menu extended with options for "investigative camera", "move camera window" and "custom layout"
- Program handling optimised for adding or changing the monitor layout
- Next to default camera layouts custom layouts can be created with freely adjustable number of columns and rows.
- New option to automatically add transmitters: With option "add on site transmitter" all VideoGateway properties and cameras will be added to transmitter camera list automatically.
- PTZ zoom in/out via mouse wheel added
- Faulty audio track display in investigative archive evaluation corrected

CamControl MV V1.1.4

2011-04-28

- Export of image and audio archive data via the investigative site archive evaluation feature
 - Freely adjustable time period (up to 60 minutes)
 - Optional password protection of the export archive
- Negative image function while in 'investigative site archive' evaluation (fraud detection)

CamControl MV V1.1.3

2011-03-01

- Audio support (minimum requirement: device firmware V1.96)
 - In live image mode
 - Playback mode while in 'investigative site archive' evaluation

CamControl MV V1.1.2

2010-11-29

- Activation of the scheduler function after program start-up
- Support of analogue PTZ cameras with a RS-485 device address (camera id) exceeding 10 (minimum requirement: device firmware V1.94)

CamControl MV V1.1.1

2010-11-15

- New Control Panel for each virtual monitor added:
 - Camera list shows dedicated cameras of the corresponding virtual monitor
 - Screen layout and cameras can be organised in camera groups
 - Fast user switching between pre programmed camera groups using new control panel
 - **Hint:** MV profiles (*.ccmv) from previous versions (1.0.14 and older) cannot be used with the current version!
- Menu and setting adjustments
- PTZ control via HeiTel **CamControl RU** (USB Joystick)
- Loading multi-view after program start-up
- Polish user interface added

CamControl MV V1.0.14

2010-08-18

- Export of single images in JPEG or bitmap format during archive evaluation
- Print option of single images during archive evaluation
- Adjustable playback speed in investigative archive evaluation
- Frame rate improvement in live and archive mode

CamControl MV V1.0.13

2010-07-02

- Central menu to setup the default basic functions of the loaded Multi-View profile:
 - Live video settings: optional conditional refresh or full frame refresh
 - Optional adjustment of live fps during investigative site archive evaluation
 - Optional alarm signalling of events: via 'Camera control inputs' (minimum requirement: device firmware V1.92)
- Additional investigative site archive evaluation
 - Archive evaluation of a single camera between over a specific period of time
 - Synchronous archive evaluation of two cameras over a specific period of time
- Scheduler: time controlled switching between different Multi-View profiles
- Support of 32 bit and 64 bit operating systems

CamControl MV V1.0.9

2009-10-09

- Live video settings improved with the option of 2 transmission modes: Conditional refresh or Full frame refresh
- Web Server connection over individually adjustable port is now possible

CamControl MV V1.0.5**2009-07-16**

- Performance improvement with new Web Server 1.19 (inclusive web API V 1.5). Requires firmware 1.80 and above to take the benefit
- Four level picture quality adjustment, for live images from analogue cameras
- Digital zoom of analogue and IP cameras
 - Maximum magnification of eight times using mouse wheel
 - Option to move the image section by holding and shifting the mouse cursor
- Optional representation of camera window information in camera investigative window

CamControl MV V1.0.4**2009-05-18**

- Support of IP cameras
- Time limit for demonstration mode increased to 15 minutes

CamControl MV V1.0.3**2009-03-31**

- Graphical representation while connection is being established
- Auto-reconnect when 'failed to establish connection' or connection loss/communication error
- Representation of errors, warnings and information in a message window:
 - Message range (number of messages/new messages)
 - Indicate/hide the message range
 - Kind of message
 - Date and time of occurrence
 - Description of message
 - Button to representation within a window
- Information button for the representation of the corresponding error message

CamControl MV V1.0.2**2008-12-15**

- Initial release
