- Video Wall Software CamControl MV launched
- IP Camera Integration for all HeiTel Systems

Video Wall Software CamControl MV launched

HeiTel's new software 'CamControl MV' (Multi-View) provides a great video wall solution for video monitoring centres.

Using the new 'CamControl MV' no less than 64 IP based live or recorded video streams can be simultaneously displayed on up to 4 monitors. These video streams can be provided by a selection out of 64 separate HeiTel video transmitters and recorders. The CamControl MV processes analogue as well as IP camera signals transmitted by HeiTel systems.
