### Training Dates in Nottinghamshire, UK

From October 2009 HeiTel offers training dates in the UK office in Nottinghamshire. It is intended to give installers a basic knowledge of how to install and commission HeiTel systems.

The training takes place at the HeiTel UK Office in Nottinghamshire.

[06. October 2009](#) - Basic of HeiTel's Video Technology

[04. November 2009](#) - Basic of HeiTel's Video Technology

[12. January 2010](#) - Basic of HeiTel's Video Technology

You can find further information in the [Training Courses section](#) of our website section and in the [registration form \(PDF\)](#).

### CamControl MV - New Features

With our latest release CamControl MV 1.0.5 HeiTel has added some extra functionality to the video wall software such as a four-level adjustment of the live video picture quality of analogue cameras and a digital zoom for live and archive video pictures from analogue or IP cameras. An eightfold zoom can be applied and the enlarged image section can be easily varied by drag and drop of the display window.

CamControl MV displays up to 64 video signals from analogue or IP cameras, flexibly arranged on up to 4 monitors.

The new software release is available to all CamControl MV users as a free download from the HeiTel partner forum.

CI Adapter

CamDisc SVR

### CI Adapter - New Features

BS 8418 Alarm Features added to CI Adapter Alarm Module -  
From SVR firmware version 1.78 onwards the 'camera control inputs' of CamServer, CamTel SVR, CamDisc SVR and Cam4mobile as well as the 50 alarm inputs on the CI Adapter alarm module feature additional functionality. Any of the alarm inputs can now be configured as 'Standard Alarms' or with 'Additional Timer Functionality'.

### Tokenistic "Plug and Play" - Professional Article by Michael Gwozdek

*"In the age of globalisation, a worldwide standard for the integration of IP cameras is essential."* HeiTel's Managing Director Michael Gwozdek takes a critical look on the IT industries licence models and the first serious attempts for creating global IP standards (ONVIF, PSIA).
